SØLVKROKEN® CATCH THE MOMENT

Spinnere

Spesial Spinner™

This spinner lure is a modern classic and has been a bestseller in Norway for many years. The shaft of the lure runs straight through the blade of the spinner which makes it spin even when winded slowly in. The combination of color and motion makes this lure irresistible to even the most sluggish of fish. Some of these spinners also have an enticing fly on the treble.

SØLVKROKEN® CATCH THE MOMENT

Svenskepilken Rustfri ™ (Stainless Steel)

This classic jig has been a bestseller world wide for both hobby and professional fisherman. The shape and shiny surface along with the motion in the water will trigger the fish to strike. The Jigger is made with glossy stainless steel and the edges have been hand welded in order to withstand the roughest environments. The "Swedish Jig" is a must have in any tackle box if you want to catch that premium Cod.
Keep in mind that the weight of the jigger doesn't decide the size of the fish but more which depth you're trying to achieve. Use short gentle jerks for more concentrated fishing or higher and more powerful jerks which will make the Jigger wander when it sinks and enable you to cover larger areas.

Jensen Sild™

Jensen Sild™ er opprinnelig en tradisjonsrik og populær sildesluk, som nå også har blitt til en pilk. Denne nyheten har en kompakt fasong som gjør at den går kjapt ned. Jensen Sild™ skal pilkes veldig forsiktig, fordi den imiterer sild, som er ett av hovedmåltidene til skikkelig stor torsk, sei, lyr osv.! Bildene viser pilken i 110 gram.

Calamar™

Calamar is a quality jig that is fast-sinking and maintains its position in strong currents. The unique design reflects the light and at the same time creates enticing sound waves in the water to allure the fish. It moves in a half circle pattern when reeled in and has a "shaking "motion when dropped.

Octopus Jig™

Design by Martin Lopez the Octopus Jig moves just like the real octopus. When the Jig is dropped, it will “swim” vertically through the water which the fish finds very enticing. The material covering the sinker is of a very high quality that at the same time gives the jig a realistic liveliness but also so strong that it will withstand numerous attacks from hungry fish without breaking.

The fishing line is first of all the main connection between the fish and the fisherman. Not only a tool to reel in the fish but also a way to introduce the fishing equipment in the best way possible. The line needs to be strong and easy to tie knots without the breaking strength of the knot getting reduced. At the same time the line has to be smooth in order to slide through the rings of the rod in a perfect way.
Sølvkroken fishing lines has an unbeatable breaking strength and is produced with all these standards in mind to suit any kind of fishing.

Sølvkroken Allround

The Havfiskebom is made of spring steel which makes it bend easily in order to store more convenient. The fishing belt with cup gives you great advantage when reeling in monster fish. The end knob gives you great support when jigging but also when fighting big fish.
